RuMeth International Ltd.

Kurt Rockeman

PO Box 844

Great Falls, MT 59403

Dear Mr. Rockeman,

The U.S. Roundtable for Sustainable Beef (USRSB) has reviewed your application for project support. The *Ruminant Methane Efficiency Tool (RMET)* aligns to the USRSB priority indicators and metrics. The project has the potential to provide significant value to the beef value-chain and USRSB stakeholders and is therefore supported by the USRSB.

As a transparent effort focused on shaping the sustainability framework of U.S. beef production, the USRSB is pleased to acknowledge the your work to develop a practical management tool that uses GHG emissions as a metric for production efficiency. Consistent with our efforts, tools and programs that help ranchers utilize their resources more efficiently aligns to the strategic mission of the USRSB to advance, support and communicate continuous improvement in the sustainability of U.S. beef production by educating and engaging the beef value-chain through a collaborative multi-stakeholder effort.

Thank you for your continued efforts to further beef sustainability in the U.S. Through efforts such as this USRSB will ensure the U.S. beef value chain remains the trusted global leader in environmentally sound, socially responsible and economically viable beef production. Please let us know if there are additional opportunities to support your work.

Sincerely,

Ashley Lyon McDonald
U.S. Roundtable for Sustainable Beef
Administrator

MISSION

To advance, support and communicate continuous improvement in the sustainability of U.S. beef production by educating & engaging the beef value-chain through a collaborative multi-stakeholder effort.
